  - B) Community feedback regarding Terry Fox run held in Guy.**  
Jackie had been approached by a community member from Guy and she was asked to bring feedback to the organizers of the event. This community member was very pleased to have the event in their area, although she recommended that the community should have been notified of the route and time of the event. This concerned person said there was a lady living on the route that would've tied up her dog since her dog was usually aggressive towards others, there was also heavy farm equipment in the area that may have used these roads at this time.

Diane wondered if a flyer in the post office would have been sufficient? Discussion within the group present decided notifying the M.D. office and those living along the route next year would be a good idea.
